PROJECTS

Cardio Care

[github](#)

- Created a deep learning model that uses ECG images to detect heart diseases.
- Used Flask to connect the model to a front end
- Used HTML, CSS and JavaScript to create an appropriate front end

Sentify

[github](#) Created a sentiment analysis project that analyzes YouTube video comments to determine the expressed sentiment

- Utilized NLP techniques to pre-process and analyze text data.
- Made a deep learning model to classify comments into positive, negative, or neutral sentiment

NGO Connect 360

[github](#)

- Built a website that helps NGOs connect with passionate individuals who are looking to help.
 - The website helps NGOs reach a wider audience and make a bigger difference
-
